CPE 241 Database

Individual Lab #01 Install and run web application

Date: Check Individual 01 assessment activities on LEB2

Introduction

By the end of Module 2, you will be introduced to a complete web application developed as a reference system. You will be able to install, configure, and run the application locally in order to understand how the front-end, back-end, and database management system (DBMS) work together as a full technology stack. The lab emphasizes practical understanding of system structure, data flow, and environment setup, preparing students to adapt the example into their own project system. The example application will serve as a structured foundation for your term project, reducing setup barriers and allowing you to focus on system design, database modeling, and feature development.

In this lab, your task is to install and successfully run the pre-developed application in your local environment. The focus at this stage is to ensure that the system is properly set up and fully operational. This will prepare you for the next phase, where you will analyze and modify the application to develop your own system.

Objectives

Install and run a full-stack web application in a local development environment.

Instructions

- Download the InvoiceLab app from GitHub.
<https://github.com/llbumpbump/InvoiceDoc2>
- Check LEB2 -> Assessment Activity -> Individual 01 – Web app installation. Follow the installation instructions video link to get this app running on your PC.
<https://drive.google.com/file/d/1NM40BP3pOOJCtEjwbWoT0-3lSYlDCKIZ/view?usp=sharing>

The PDF file of the slides used in the video can also be found there.

Deliverables

Submit a PDF to show that you are able to run the app by:

1. Add a new invoice with at least 3 line items. Show a screen dump of the saved invoice in the Invoice Form View.
 2. Show a screen dump with your new invoice in the Invoice List View.
-

Final Submission

- Submit a PDF file and ensure it is named appropriately (e.g., **IND01_YourStudentID.pdf**) then submit the report on LEB2 before the deadline.
- Upload the PDF report to the Assessment Activities section for Individual01 on LEB2.
